The National Association of State Budget Officers

Founded in 1945, NASBO is the instrument through which the states collectively advance state budget practices. The major functions of the organization consist of research, policy development, education, training, and technical assistance. These are achieved primarily through NASBO's publications, membership meetings, and training sessions. Association membership is composed of the heads of state finance departments, the states' chief budget officers, and their deputies. All other state budget office staff are associate members. NASBO is an independent professional and educational association and is also an affiliate of the National Governors Association.

Preface

Since its inception in 1987, the State Expenditure Report has developed into a definitive baseline for the analysis of state spending. This edition of the report includes data from actual fiscal 2010, actual fiscal 2011, and estimated fiscal 2012. Expenditures reflected in this report represent more than 99 percent of total state spending.

Expenditure data are detailed by program area so that trends in state spending can be evaluated. The funding sources for

state expenditures also are identified. Readers are cautioned that a more complete understanding of service levels within a given state would require comparisons of spending by both state and local governments, which is not the purpose of this report. In addition, the data are self-reported by the states. Additional information on the report's methodology is provided in the Appendix.

Acknowledgments

The State Expenditure Report was produced by Brian Sigritz with assistance from Lauren Cummings, Stacey Mazer, Michael Streepey, and Kathryn Vesey White. In addition, the report represents substantial work by state budget office staff throughout the United States. NASBO thanks the following individuals for their assistance in providing state data for this report:

Executive Summary

Overview

State Expenditures have seen tremendous shifts over the past several years due to the ramifications of the recent national recession. Spending from state funds (general funds and other state funds combined) declined in fiscal 2010, marking the first occurrence of an outright spending decline from state funds in the 25-year history of the *State Expenditure Report*. As the national economy slowly improved, spending from state funds once again turned positive, increasing 4.1 percent in fiscal 2011 and an estimated 4.0 percent in fiscal 2012.

While spending from state funds declined in fiscal 2010, spending from federal funds rose sharply, increasing by 21.4 percent. This increase in federal funds was directly attributed to the passage of the *American Recovery and Reinvestment Act of 2009 (ARRA)*, also known as the Recovery Act or stimulus. However, the rapid increase in federal funds was short-lived. Federal funds only increased by 0.7 percent in fiscal 2011 and are estimated to have declined by 8.2 percent in fiscal 2012, due to the wind-down of Recovery Act spending.

This recent combination of state funds slowly increasing and federal funds rapidly declining has created a unique and in some ways unprecedented fiscal situation for states. Total state expenditures from all fund sources grew 5.4 percent in fiscal 2009, slowed somewhat to 3.8 in fiscal 2010, slowed further to 2.8 percent in fiscal 2011, and are estimated to have increased by only 0.1 percent in fiscal 2012. The 0.1 percent increase in total state expenditures in estimated fiscal 2012 marks the lowest total state expenditure growth level since the *State Expenditure Report* was first published in 1987.

This edition of the report includes data from actual fiscal 2010, actual fiscal 2011, and estimated fiscal 2012, while the text of the report focuses on actual fiscal year 2011 data, with a secondary focus on estimated fiscal 2012.

State Spending Trends, Fiscal 2011 and Fiscal 2012

General fund spending, the component of state budgets that comes from revenue sources such as states' income and sales taxes, was most negatively impacted during the downturn. After growing 8.5 percent in fiscal 2007 and 4.2 percent in fiscal 2008, general fund spending declined 2.9 percent in fis-

cal 2009 and an additional 6.5 percent in fiscal 2010. The reduction in general fund spending was due to a rapid decline in state revenue resulting from the economic downturn. During the two-year period from fiscal 2008-2010 state general fund revenues decreased 11.6 percent, or by \$77.6 billion. However, state revenues have begun to recover over the past two years with general fund revenues growing 10.4 percent, or \$61.6 billion, from fiscal 2010-2012. The growth in state revenues has allowed general fund spending to once again turn positive. General fund spending increased 3.1 percent in fiscal 2011 and grew by an estimated 4.3 percent in fiscal 2012.

While general fund spending significantly declined in fiscal 2009 and fiscal 2010, federal fund spending experienced sizable increases. After growing a relatively modest 2.9 percent in fiscal 2007 and 2.4 percent in fiscal 2008, federal fund spending increased 19.3 percent in fiscal 2009 and 21.4 percent in fiscal 2010. The drastic increase in federal funds for states can be traced to the infusion of ARRA or Recovery Act funds. States reported that they spent \$43.2 billion in federal Recovery Act funds in fiscal 2009 and \$118.6 billion in fiscal 2010. The flow of ARRA funds began to slow in fiscal 2011, as states reported that they spent \$93.7 billion in fiscal 2011. ARRA spending is estimated to have declined much further in fiscal 2012, with states reporting that they spent \$27.5 billion in ARRA funds. The swift wind-down of ARRA funds led federal fund spending to grow by only 0.7 percent in fiscal 2011 and to decline by 8.2 percent in fiscal 2012.

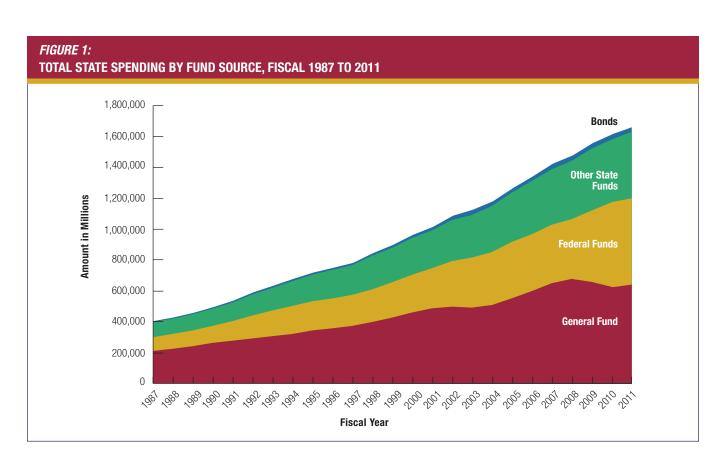

The recent improvement in the national economy has not translated to strong growth in total state expenditures. This is largely due to the fact that state revenues have not increased as fast as ARRA funds have declined. Case in point, general fund revenues increased \$61.6 billion from fiscal 2010-2012 while ARRA funds declined \$91.1 billion. This has led to a unique situation in which total state expenditure growth has slowed during the same time that the national economy has been improving. Total state expenditures climbed to \$1.617 trillion in fiscal 2010, a 3.8 percent increase, and reached \$1.663 trillion in fiscal 2011, a 2.8 percent increase. In fiscal 2012, total state expenditure growth is estimated to have remained nearly flat, growing by only 0.1 percent to \$1.665 trillion. Total state expenditure growth during all three years was less than the historical average. Since 1987, total state expenditures have annually increased on average approximately 6 percent.

The economic downturn and federal ARRA funds have combined to produce a shift in the funding sources for state expenditures. In fiscal 2008, the last year before ARRA, general funds accounted for 45.9 percent of total state spending, federal funds were 26.3 percent, other state funds were 25.5 percent, and bonds reflected 2.4 percent of the total. By fiscal 2010, general funds accounted for 38.1 percent of total state expenditures, federal funds 34.8 percent, other state funds 24.9, and bonds were 2.2 percent of the total. Therefore, over a two-year period, general funds shrunk from representing 45.9 percent of total state expenditures to 38.1 percent while federal funds rose from 26.3 percent to 34.8 percent. However, due to the rapid decline in ARRA funds, general funds, as expected, are starting to once again make up a larger component of total state expenditures. In fiscal 2012, general funds are estimated to account for 39.8 percent of total state expenditures, federal funds 31.2 percent, other state funds 26.5 percent, and bonds 2.5 percent.

Other details of state expenditures include:

 Medicaid continues to rise as a percentage of total state expenditures. In fiscal 2010 Medicaid represented 22.2 percent of total state expenditures, 23.7 percent in fiscal 2011, and is estimated to represent 23.9

- percent in fiscal 2012. At the same time, elementary and secondary education has gone from representing 20.4 percent of total state expenditures in fiscal 2010, to 20.2 percent in fiscal 2011, and an estimated 19.8 percent in fiscal 2012, the first time total state spending on K-12 has fallen below 20 percent.
- While Medicaid continues to represent a greater share of total state expenditures, the growth of total state spending on Medicaid has slowed due to the rapid decline in ARRA funds and cost containment actions at the state level. Total Medicaid spending grew 9.6 percent in fiscal 2011 and an estimated 1.2 percent in fiscal 2012. Federal funds for Medicaid grew 4.1 percent in fiscal 2011 and are estimated to have declined 7.8 percent in fiscal 2012. State funds increased 20.3 percent in fiscal 2011 and are estimated to have grown 16.2 percent in fiscal 2012.
- When looking only at general fund spending, elementary and secondary education remains the largest category in fiscal 2011 at 35.1 percent, with Medicaid second at 16.7 percent. Those two categories, combined with higher education at 11.3 percent, account for nearly two-thirds of general fund spending.

- Elementary and secondary education total expenditures increased by 1.5 percent in fiscal 2011 and declined by 1.9 percent in estimated fiscal 2012.
 While state funds increased by an estimated 2.9 percent in fiscal 2012, federal funds declined by 19.7 percent due to the reduction in ARRA spending.
- Total expenditures for higher education grew 3.8 percent in fiscal 2011 and are estimated to have declined by 4.1 percent in fiscal 2012. State funds for higher education grew by 5.0 percent in fiscal 2011 and are estimated to have declined by 2.7 percent in fiscal 2012, while federal funds grew 0.4 percent in fiscal 2011 and declined by an estimated 11.4 percent in fiscal 2012.
- Total public assistance grew 0.9 percent in fiscal 2011 and is estimated to have declined by 13.1 percent in fiscal 2012. The spending decline in fiscal 2012 is partly due to California shifting financial

FIGURE 2:

- responsibility for certain public assistance programs to counties as part of realignment. Public assistance represented 1.7 percent of total state expenditures in fiscal 2011.
- Total corrections spending increased by 1.1 percent in fiscal 2011 and is estimated to have increased by 2.5 percent in fiscal 2012. As state funds comprise approximately 96 percent of total corrections expenditures, corrections was not as affected by the slowdown of federal Recovery Act spending in fiscal 2012. Corrections accounted for 3.1 percent of total state expenditures in fiscal 2011 and 7.5 percent of general funds.
- Total transportation spending—7.4 percent of total state expenditures—increased by 0.8 percent in fiscal 2011 with state funds increasing by 2.3 percent and federal funds declining by 1.8 percent. In fiscal 2012, total transportation spending is estimated to have grown by 9.1 percent with state funds increasing by 9.3 percent and federal funds increasing by 6.0 percent. The comparably large increase in fiscal 2012 is concentrated in a small number of states.
- Total state spending on capital projects decreased by 2.9 percent in fiscal 2011 and is estimated to have increased by 9.5 percent in 2012. Because capital spending often includes long construction timetables and unforeseen or delayed project costs, capital spending growth frequently fluctuates from one year to the next.

Explanation of Report Data: Components of State Expenditures

This report includes three years of state expenditure data: actual fiscal 2010, actual fiscal 2011, and estimated fiscal 2012. The text primarily focuses on actual fiscal 2011 with a secondary emphasis on estimated fiscal 2012 and examines the seven main functional categories of state spending: elementary and secondary education, higher education, public assistance, Medicaid, corrections, transportation, and "all other." ("All other" is a broad category that includes state functions not tracked individually in this report, such as hospitals, economic development, housing, environmental programs, health programs and the Children's Health Insurance Program (CHIP), parks and recreation, natural resources, air transportation, and water transport). Capital spending is included with

operating expenditures within each functional category, unless noted otherwise. Capital expenditures also have been collected separately in the following categories: corrections, environmental projects, higher education, housing, transportation, and "all other". It should also be noted that twenty-one states use a biennial budget cycle, and in many cases funds are not expended evenly in the two-year cycle. This may affect total expenditures in some states from year to year.

State governments have specific functional responsibilities that vary among states depending on the role of local governments in providing services. For example, in many states, the funding of elementary and secondary education is considered primarily a local function. Some states are exceptions, such as Hawaii where state government fully funds elementary and secondary education. A more complete understanding of programs and service levels within a given state would require comparisons of spending by both state and local government, which is not the purpose of this report. In addition, because the data are self-reported by the states, some may be incomplete. These omissions can affect aggregate and regional tables.

While state balanced budget requirements are diverse, and governors are given significant powers to ensure a balanced budget, states operate within stricter revenue/expenditure lim-

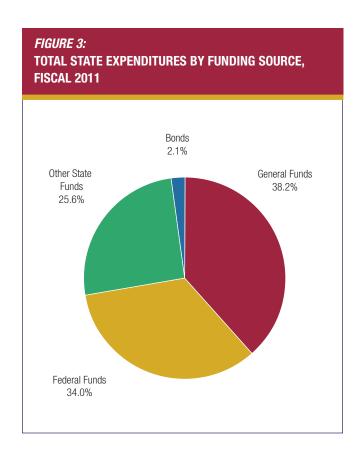

itations than the federal government. An overwhelming majority of states require their governor to submit, and their legislature to pass, a balanced budget. States are required to make spending choices within available resources and must either reduce spending, raise taxes, or use reserves when revenues come in below estimates. For the most part, states do not and cannot incur operating deficits, and manage their finances in ways to keep or improve positive bond ratings.

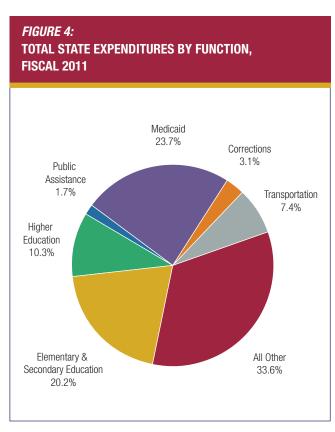

Explanation of Report Data: Definitions

General Fund: The predominant fund for financing a state's operations. Revenues are received from broad-based state taxes. However, there are differences in how specific functions are financed from state to state.

Federal Funds: Funds received directly from the federal government.

Other State Funds: Expenditures from revenue sources that are restricted by law for particular governmental functions or activities. For example, a gasoline tax dedicated to a highway trust fund would appear in the "Other State Funds" column. For Medicaid, other state funds include provider taxes, fees, donations, assessments, and local funds.

Bonds: Expenditures from the sale of bonds, generally for capital projects.

State Funds: General funds plus other state fund spending, excluding state spending from bonds.

Fiscal 2011 spending by fund source is detailed in Figure 3. General funds had decreased as an overall percentage of state expenditures since fiscal 2008, going from 45.9 percent of total expenditures in fiscal 2008 to 38.2 percent in fiscal 2011. At the same time, the share of state spending from federal funds grew from 26.3 percent in fiscal 2008 to 34.0 percent in fiscal 2011. The trend began to reverse in fiscal 2012 due to the decline of ARRA funds. In fiscal 2012 it is estimated that general funds comprised 39.8 percent of total expenditures while federal funds comprised 31.2 percent.

Figure 4 reflects total state expenditures by functional areas. For fiscal 2011, total state spending shares are as follows: 23.7 percent for Medicaid; 20.2 percent for elementary and secondary education; 10.3 percent for higher education; 7.4 percent for transportation; 3.1 percent for corrections; 1.7 percent for public assistance; and 33.6 percent for all other.

The shares of state spending for the seven functional areas tracked in the State Expenditure Report have shifted since

1987, when the report was first published. For example, in total state spending, Medicaid surpassed higher education as the second largest state program in 1990, and in 2003 it became the largest, displacing elementary and secondary education. Since 2003, Medicaid and elementary and secondary education have alternated as the largest share of total state spending. Whereas in fiscal 2008 elementary and secondary education was the largest component, in fiscal 2009 Medicaid represented the largest share, due to increased Medicaid enrollment and spending resulting from the economic decline. In fiscal 2011 Medicaid will continue to grow as a percentage of total state expenditures, representing 23.7 percent, while elementary and secondary education will decline to 20.2 percent. Figure 5 documents the changes in state expenditures by category since 1987. Table 3 reflects shares of state spending in functional areas, by fund source, from 1995 to 2012. Also, Table 5, at the end of the Executive Summary, highlights the share of each state's budget represented by various programs in fiscal 2011 and shows the wide variation among states in their spending patterns.

General Fund Expenditures

Expenditures for elementary and secondary education continue to constitute the largest share of state general fund spending.

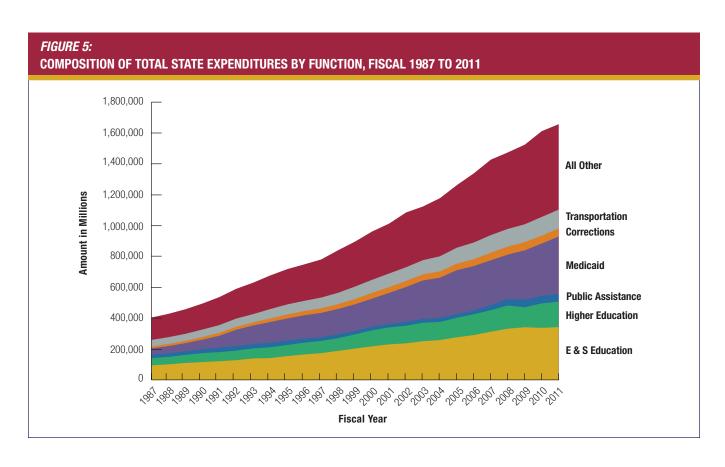

FIGURE 6: **GENERAL FUND EXPENDITURES, FISCAL 2011** Medicaid 16.7% Corrections Public 7.5% Assistance 1.9% Transportation 0.4% Higher Education 11.3% Elementary & All Other Secondary Education 27.1% 35.1%

As Figure 6 shows, in fiscal 2011, 35.1 percent of general fund spending went to elementary and secondary education. Medicaid accounted for 16.7 percent and higher education accounted for 11.3 percent of general fund spending.

Figure 7 reflects the percentage change for general fund spending in each of the functional categories. The impact of the economic downturn on state spending is clearly illustrated. In fiscal 2011, most categories of general fund spending saw increases after previously experiencing declines in fiscal 2010. Fiscal 2012 estimates show a more varied pattern with four categories of general fund spending experiencing growth and three categories experiencing declines. Overall, general fund spending increased 3.1 percent in fiscal 2011 and is estimated to have increased 4.3 percent in fiscal 2012.

Other State Funds Expenditures

Trailing only the "all other" category, higher education and transportation account for the next largest portions of other state funds spending for fiscal 2011, at 17.2 percent and 16.0 percent respectively. Other state funds are expenditures from revenue sources which are restricted by law for particular governmental functions or activities. For transportation, these funds largely represent receipts from gasoline taxes earmarked for highways (see Table 3).

Federal Fund Expenditures

As reflected in Figure 8, Medicaid accounts for the largest portion of state spending from federal funds in fiscal 2011 at 43.7 percent. Elementary and secondary education at 12.5 percent and transportation at 7.0 percent are the next largest categories.

Regional Spending Trends

Table 4 shows growth rates for each region of the United States, separated by state funds (general fund plus other state funds, not including bond funds) and federal funds. The 2010-2011 growth rate for all states was 2.8 percent in fiscal 2011. In fiscal 2012, total estimated state spending increased 0.1 percent, with the Plains region having the highest growth rate at 3.5 percent and the Rocky Mountain region having the lowest declining 3.5 percent.

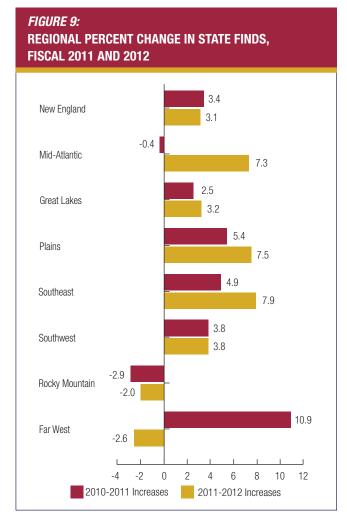

Figure 9 shows the percentage change in state spending from state funds for 2010-2011 and 2011-2012. In fiscal 2011, all but the Mid-Atlantic and Rocky Mountain regions saw increases in spending from state funds while in fiscal 2012 it is estimated that all but the Rocky Mountain and Far West regions saw increases in spending from state funds. Total state expenditure data can be found on Tables 1-5, along with related footnotes at the end of this chapter.

General Notes

In reviewing the tables, please note the following:

- Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.
- "State funds" refers to general funds plus other state fund spending. State spending from bonds is excluded.
- "Total funds" refers to funding from all sources—general fund, federal funds, other state funds, and bonds.
- The report methodology is detailed in the Appendix.

All States: Medicaid reflects provider taxes, fees, assessments, donations, and local funds in Other State Funds.

Alabama: Amounts shown in fiscal years 2010 and 2011 are based on actual expenditures during these years, regardless of the year appropriated. Fiscal 2012 amounts shown are equal to actual expenditures through 9 months and then annualized for the year.

Florida: Federal figures for 2010 and 2011 have increased as a result of ARRA expenditures being excluded in prior reporting submissions. ARRA expenditures are reflected in the Federal Funds totals for all years.

Illinois: Fiscal 2012 GRF expenditure includes \$4,135 million for meeting the statutorily required pension obligation. In fiscal 2010 and fiscal 2011 this obligation was met through debt proceeds.

Massachusetts: Commonwealth of Massachusetts does not record estimates for non-budgetary trust fund spending. Therefore, the figures included for Fiscal 2012 under "Other Trust Fund" spending are year-to-date actual spending figures as of mid-July 2012. This means that these figures are more than likely lower than what the full year spending figures are likely to be, as the account payable period for the Commonwealth does not end until late August.

New Jersey: 2010 Actual spending from Casino Control, Casino Revenue, and Gubernatorial Elections Funds have been shifted from "General Funds" to "Other State Funds."

2010 Actual spending adjusted for the reallocation of fringe benefits to the attributable funding sources.

New York: New York budgets most employer contributions to employee's benefits and pensions centrally. The portion of employer contributions to employee's benefits not distributed to an expenditure category has been included in the All Other expenditures category.

North Dakota: \$401 million of the increase in fiscal 2012 relates to transfers from other state funds to the general fund. In previous periods, these expenditures were made directly from the other funds.

Tennessee: Tennessee collects personal income tax on income from dividends on stocks and interest on certain bonds. Tax revenue estimates do not include federal funds and other departmental revenues. However, federal funds and other departmental revenues are included in the budget as funding sources for the general fund, along with state tax revenues.

Texas: Higher Education figures include amounts for Community Colleges that could not be broken out by method of finance. Transportation figures do not include highway construction.

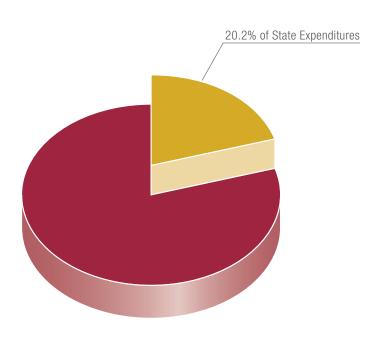

Utah: All numerical information presented represents bond "expenditures". All bond information included in the report is for General Obligation bonds. Not included in the report is State Building Ownership Authority (SBOA) Revenue Bonds or Board of Regents Revenue Bonds.

Vermont: In fiscal 2010, the General Fund had \$774 million in expenditures and \$317 million in fund transfers out of the General Fund to Other State funds where the expenditures were recorded. Total expenditures and transfers out for the General Fund where \$1,091 million. In fiscal 2011, the General Fund had \$ 744 million in expenditures and \$400 million in fund transfers out of the General Fund to Other State funds where the expenditures were recorded. Total expenditures and transfers out for the General Fund where \$1,144 million. In estimated expenditures and \$516 million in estimated fund transfers out of the General Fund to Other State funds where the expenditures were recorded. Total estimated expenditures and transfers out of the General Fund to Other State funds where the expenditures were recorded. Total estimated expenditures and transfers out for the General Fund where \$1,272 million.

ELEMENTARY & SECONDARY EDUCATION

Elementary and Secondary Education Expenditures

State elementary and secondary education expenditures totaled \$335.2 billion in fiscal 2011, a 1.5 percent increase over the previous year. This increase resulted from modest growth in both federal funding and state spending on K-12 education. Federal funds increased by 2.4 percent in fiscal 2011, while state funds (general funds and other state funds combined) increased by 0.9 percent. The federal increase came in spite of a net decline in education funds under the *American Recovery and Reinvestment Act of 2009 (ARRA)*. In fiscal 2011, states received \$20.1 billion in ARRA funds for elementary and secondary education, compared to \$24.8 billion in fiscal 2010.

In fiscal 2012, it is estimated that elementary and secondary expenditures declined by 1.9 percent, due to a substantial decline in federal dollars. State funds grew by an estimated 2.9 percent, while federal funds for K-12 education declined by an estimated 19.7 percent in fiscal 2012. This decrease partly resulted from the expiration of most ARRA funds for K-12 education; states received \$7.0 billion in ARRA funds for K-12 in fiscal 2012 compared to \$20.1 billion in fiscal 2011.

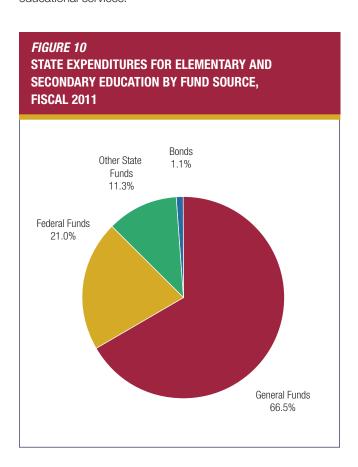

In fiscal 2011, general funds comprised 66.5 percent of state elementary and secondary education spending, federal funds comprised 21.0 percent, other states funds comprised 11.3 percent, and bonds comprised 1.1 percent (see Figure 10). Federal funds grew from representing 14.0 percent of overall K-12 expenditures in fiscal 2008, the last year before ARRA, to 21.0 percent in fiscal 2011, demonstrating states' growing reliance on federal dollars to fund elementary and secondary education during this period. As a result of ARRA funds winding down, this trend began to reverse in fiscal 2012, with federal funding comprising an estimated 17.2 percent of overall K-12 expenditures.

While elementary and secondary education is historically the largest category of total state spending, it was surpassed by Medicaid in fiscal 2009. In fiscal 2011, Medicaid comprised 23.7 percent of total state spending and K-12 represented 20.2 percent. Elementary and secondary education remains by

far the largest component of general fund spending in fiscal 2011 at 35.1 percent compared to 16.7 percent for Medicaid.

Sources of Funding

State funding systems for education vary greatly. Over the years, a number of states have moved toward increasing their share of funding for elementary and secondary education by substituting state funds for local funds, often in order to reduce local governments' reliance on property taxes. Funds are distributed to schools both through general funds on a per-pupil basis and as categorical grants to support specific programs or needs. The federal share is typically a source of supplemental funding for poor school districts and also helps pay the cost of educating children with special needs. However, federal funds through ARRA have mostly been used to maintain basic educational services.

Regional Expenditures

The following table shows percentage changes in expenditures for elementary and secondary education for fiscal 2010-2011 and 2011-2012 by region.

TABLE 6

ESEA Reauthorization & Flexibility Requests

The Elementary and Secondary Education Act (ESEA), commonly known as "No Child Left Behind" (NCLB), continues to await reauthorization by Congress. In fall 2011, the U.S. Department of Education announced that it would grant states flexibility from certain NCLB provisions in exchange for implementing various reforms to increase accountability. As of November 1, 2012, 34 states plus the District of Columbia had been approved for NCLB waivers, and 10 states had outstanding requests pending approval.

Elementary and Secondary Education— Expenditure Exclusions

When comparing resources spent on elementary and secondary education, it is important to understand the types of programs states exclude from these figures. For this report, 13 states wholly or partially excluded employer contributions to teacher pensions and 15 states wholly or partially excluded contributions to health benefits. Additionally, other items that are wholly or partially excluded include: day care programs (39 states), school health care (41), Head Start (30), and libraries (27). Summary expenditure data can be found in Tables 7 through 9, accompanied by explanatory notes. Table 10 lists programs excluded from the expenditure data.

Elementary and Secondary Education Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Alabama: Federal funds received directly by local school systems are not reported at the state budget level.

Colorado: School personnel are paid at the school district level—state costs for employer contributions to employee pensions and health benefits only reflect Colorado Dept. of Education personnel. Funds library-related programs across the state.

Florida: For FY 2011-12, Early Childhood Education (Day Care) was moved into the Department of Education. It is included in the Estimated 2011-12 but not in the Actual 2009-10 or 2010-11.

Hawaii: Employer contributions to current employees' pensions and health benefits: general fund amounts are budgeted centrally (except for Elementary and Secondary Education and Higher Education) and reported in "All Other State Expenditures." For non-general funds, employer contributions are shown in each functional area.

Maryland: FY 2011 total fund expenditures include \$179 million from the federal Education Jobs Fund. This was a one-time

award required to be spent in FY 2011 and is therefore not included in FY 2012 expenditures. In addition, FY 2011 total fund expenditures include \$125 million in federal Race to the Top awards granted to local education agencies that is not included in the FY 2012 budget. Total fund K-12 expenditures in FY 2012 decrease from FY 2011 as a result of these two items.

Michigan: Elementary and Secondary Education—Figures reflect K-12 education, the Michigan Department of Education, adult education and pre-school. Employer contributions to current employees' pensions and health benefits are reported for Department of Education employees but excluded for employees of K-12 schools. Funding for libraries is included under elementary and secondary education effective for fiscal 2010, reflecting the merger of functions under Executive Order 2009-36. Actual ARRA expenditures will be recorded with the fiscal 2012 annual financial report.

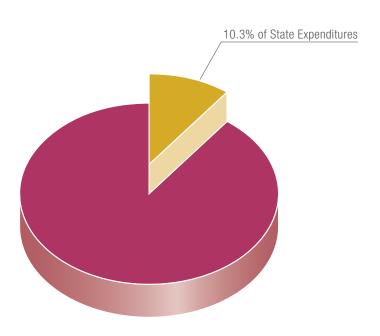

New York: Total expenditures are adjusted to eliminate the impact of delaying the end-of-year school aid payment (\$2.06 billion) from March 2010 to the statutory deadline of June 1, 2010, which was done to carry forward the FY 2010 budget shortfall into FY 2011.

Utah: Included with General Fund is the Education Fund (income tax revenue) which in Utah is restricted by the Utah state constitution for the sole use of public and higher education.

HIGHER EDUCATION EXPENDITURES

Higher Education Expenditures

State higher education spending reflects state financial support of public university systems, community colleges, and vocational education institutions. In fiscal 2011, states spent \$171.8 billion on higher education, 10.3 percent of total state spending, and 11.3 percent of general fund expenditures. General funds account for 41.8 percent of state spending on higher education, other state funds 42.5 percent, federal funds 11.9 percent, and bonds 3.8 percent (see Figure 11 and Table 12).

Overall, total state higher education spending grew by 3.8 percent in fiscal 2011. State funds (general funds plus other state funds) increased by 5.0 percent, while federal funds grew slightly by 0.4 percent. In fiscal 2011, states report that \$3.3 billion of the federal funds for higher education were attributable to the *American Recovery and Reinvestment Act of 2009 (ARRA)*. In fiscal 2012, estimated total state higher education spending declined by 4.1 percent with state funds declining by 2.7 percent and federal funds declining by 11.4 percent. The large decline in federal funds is due primarily to the wind down of ARRA funds, with states estimating that they spent \$0.7 billion in ARRA higher education funds in fiscal 2012, approximately \$2.6 billion less than fiscal 2011.

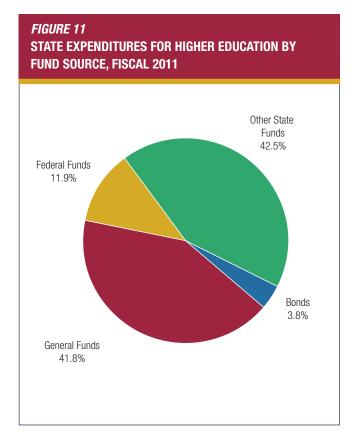

TABLE 11

Capital Spending

State expenditures for higher education-related construction, renovation and other capital projects decreased by 4.3 percent in fiscal 2011, and are estimated to decrease by 13.7 percent in fiscal 2012 (see Table 48).

Regional Expenditures

In fiscal 2011, the New England region saw the greatest percentage increase in total state higher education spending at 15.5 percent, while the Rocky Mountain region experienced the largest decline, decreasing by 2.0 percent (see Table 11). It should be noted that the decline in state spending in the Rocky Mountain region is largely caused by a change in the way that Colorado records its budget for certain higher education expenditures (specifically employer contributions to pensions and health benefits). (See Higher Education Notes for more details.)

Financing Issues

While state funds for higher education increased in fiscal 2011 and decreased in fiscal 2012, tuition and fees rose both years. According to the College Board, average tuition and fees at four-year public institutions rose 4.6 percent between the

2010-11 and 2011-12 academic years and 3.4 percent between 2011-12 and 2012-13, after adjusting for inflation. In recent years, rising tuition rates and fees have been accompanied by similar increases in student aid. However, based on the College Board data, total aid per student (including grants, federal loans, work-study, and education tax benefits) increased by 5.2 percent between the 2009-10 and 2010-11 academic years but declined by 1.5 percent between 2010-11 and 2011-12, again adjusting for inflation. In response to these trends, a growing number of initiatives led by governors and state legislatures are aiming to increase the affordability of public higher education by curbing institution costs and restricting tuition increases.

Higher Education—Expenditure Exclusions

In calculating higher education expenditures for fiscal 2011, nine states wholly or partially excluded tuition and fees, and 18 states wholly or partially excluded student loan programs. Additionally, other items that are wholly or partially excluded include: university research grants (32 states), vocational education (15), and assistance to private colleges or universities (22). Summary expenditure data can be found in Tables 12 through 14, accompanied by explanatory notes. Table 15 lists programs excluded from the expenditure data.

Higher Education Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Alabama: Other state funds for Higher Education include tuition and fees as reported by institutions. Bonds issued and expended directly by institutions are not reported at the state budget level.

Colorado: For FY 11-12, Higher Education institutions did not record budget related to informational appropriations for tuition and certain fee revenue. FY 11-12 was the first year that the annual budget bill (Long Bill) listed the appropriations as informational only. Thus, there is a large decline in HED. HED colleges and universities pay pension and health benefits out of their allotments, which include but are not limited to, state appropriations/requests. The College Opportunity Fund (COF) provides some (stipend) funds to students who attend private colleges and universities. However, this sum is very small relative to the total expenditure; as such, it is categorized as excluded for purposes of this survey.

Florida: The dollar difference between "Other" for Actual 2009-10 and "Other" for 2010-11 and Estimated 2011-12 is mainly attributable to university tuition. University tuition is included in "Other" for Actual 2010-11 and Estimated 2011-12, but excluded in "Other" for Actual 2009-10. Tuition revenue does not get deposited into our Treasury, but stays at each university. It was not reported as an "Actual" expenditure of the state for 2009-10.

Hawaii: Employer contributions to current employees' pensions and health benefits: general fund amounts are budgeted

centrally (except for Elementary and Secondary Education and Higher Education) and reported in "All Other State Expenditures." For non-general funds, employer contributions are shown in each functional area.

Michigan: Higher Education—General Fund support in fiscal 2010 and fiscal 2012 reflects a shift to the state School Aid Fund for operating budgets. Federal fund support reflects receipt of TANF revenue for student financial aid: \$78.3 million (fiscal 2010), and \$84.6 million (fiscal 2011), and \$93.8 million (fiscal 2012). A total of \$68.2 million of federal ARRA funding for colleges, universities and postsecondary education programs is included for fiscal 2010.

New Jersey: Higher Education General Funds 2010 Actuals are adjusted to now include related debt service expenses.

Oregon: Beginning in fiscal 2012, the Oregon University System operates as a "public corporation" and as such is no longer considered part of the state budget. The OUS continues to receive General Fund support from the state, as indicated in the survey results, but OF and FF expenditures now only reflect capital expenditures and debt.

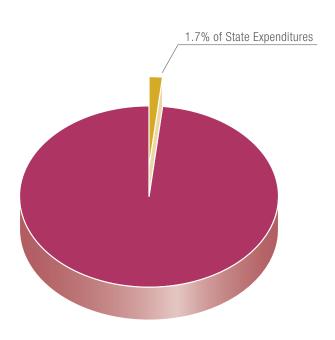

Utah: Included with the General Fund is the Education Fund (income tax revenue) which in Utah is restricted by the Utah state constitution for the sole use of public and higher education.

Wisconsin: WI Act 32 consolidated most GPR appropriations into two "block grant" appropriations (classified as state operations). This accounts for the \$20.6M decrease in GPR Aids. Federal appropriations were also consolidated into one "block grant" appropriation (also classified as state operations). This accounts for the \$1,035.9M decrease in FED Aids.

PUBLIC ASSISTANCE EXPENDITURES

Public Assistance Expenditures

This report contains data on cash assistance provided through the Temporary Assistance for Needy Families (TANF) program and other public assistance programs. Spending for these categories totaled \$27.6 billion in fiscal 2011 and represented 1.7 percent of total state expenditures. Spending from all funds for public assistance increased by 0.9 percent from fiscal 2010 to fiscal 2011with spending from state funds increasing by 2.8 percent and spending from federal funds declining by 0.6 percent from fiscal 2010 to fiscal 2011.

Spending on total public assistance from all funds decreased by 13.1 percent from fiscal 2011 to fiscal 2012 to total \$24.0 billion. State funds decreased by 17.6 percent and federal funds decreased by 9.4 percent. California shifted financial responsibility for certain public assistance programs that were previously funded with state general funds to counties. This was done as part of a major public safety realignment effective July 2011 and accounts for a significant portion of the decrease in funding from fiscal 2011 to fiscal 2012.

The TANF Emergency Fund, authorized under *The American Recovery and Reinvestment Act of 2009 (ARRA)*, provided up to \$5 billion to states, tribes, and territories through September 30, 2010. States spent approximately \$2 billion in ARRA funds in both fiscal 2010 and fiscal 2011 and approximately \$131 million in fiscal 2012. The large decrease in federal funds from fiscal 2011 to fiscal 2012 is attributable to the expiration of the ARRA funds.

The primary sources of public assistance funding for fiscal 2011 are federal funds, providing 54.8 percent, followed by general funds at 43.9 percent (see Figure 12). For estimated fiscal 2012, federal funds represent 57.1 percent of the total while general funds are 41.5 percent of the total.

The "other cash assistance" category, which includes optional state programs for Supplemental Security Income (SSI) and General Assistance, are not funded in all states, and when funded, are relatively small programs.

TANF

The Temporary Assistance for Needy Families (TANF) program was reauthorized under the *Deficit Reduction Act* in February 2006. The TANF block grant is funded at \$16.6 billion each year and is currently authorized under a continuing resolution. The program includes specific definitions of work, work verification requirements, and penalties if states do not meet the

requirements. As a result of these changes, most states have to significantly increase work participation rates.

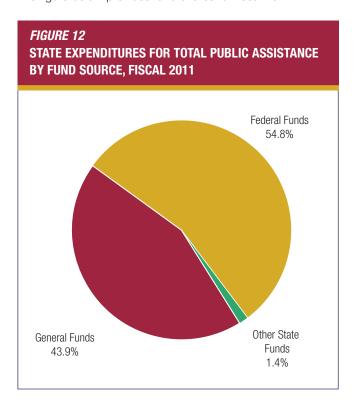

States have wide flexibility under TANF to determine their own eligibility criteria, benefit levels, and the type of services and benefits available to TANF recipients. States must maintain a historical level of state spending or maintenance of effort requirement and must meet minimum work participation rate requirements. In addition, families that have received federally funded assistance under TANF for five cumulative years are not eligible for federally funded assistance, though states have considerable flexibility in determining how time limits apply to individual families. This report has information only on the cash assistance benefit levels within the program and does not reflect total TANF spending.

Since welfare reform was initially passed in 1996, states have focused on providing supportive services for families to achieve self-sufficiency rather than cash assistance. Since 1996, caseloads have declined significantly. The average monthly number of recipients fell from 12.8 million prior to the enactment of TANF to 4.4 million on average in 2011, a decrease of over two-thirds.

Expenditure data on total cash assistance, TANF cash assistance, and other cash assistance can be found on Tables 16-26, accompanied by explanatory notes.

Fund Shares

The figure below provides fund shares for fiscal 2011.

Regional Expenditures

The following table shows regional percentage changes in expenditures for total cash assistance for fiscal 2010-2011 and 2011-2012 by region.

Expenditures for Cash Assistance under Temporary Assistance for Needy Families (TANF) Program

State and federal funds for TANF cash assistance expenditures totaled \$17.6 billion in fiscal 2011, a decrease of 0.3 percent from 2010 to 2011 (see Table 23). State funds increased by 6.4 percent and federal funds decreased by 3.1 percent from fiscal 2010 to fiscal 2011. For fiscal 2012, total spending for TANF cash assistance expenditures decreased by 18.1 percent to \$14.4 billion with federal funds declining by 12.2 percent and state spending declining by 30.7 percent. Cash assistance payments under TANF comprise approximately 29 percent of total TANF spending.

States have provided funding for programs to address child-care services, subsidized employment, training and education, transportation needs, transitional rental assistance, substance abuse, job readiness and job retention training, and domestic violence. As cash assistance has declined, these supportive services have gained greater importance in the program.

Expenditure data for TANF cash assistance can be found on Tables 21-23.

Expenditures for Other Cash Assistance

The second component of cash assistance for public welfare is other cash assistance, including state participation in the Supplemental Security Income (SSI) program, General Assistance (GA), and emergency assistance. Each state determines the structure of its own program, resulting in significant variations in programs and funding. Some have statewide uniform eligibility rules while others simply require some form of county participation. Thirty-three states spend some amount on other cash assistance.

Other cash assistance programs accounted for 0.6 percent of total state spending in fiscal 2011. States spent \$10.0 billion for other cash assistance, with 67.5 percent of that amount funded from state general funds in fiscal 2011. Expenditure data for other cash assistance can be found on Tables 24-26.

Notes: State funds are defined as general funds and other state funds (bonds are excluded).

Public Assistance Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

California: Effective July 2011, financial responsibility for certain public assistance programs previously funded with state General Fund was fully shifted to counties as part of a major public safety realignment. Realigned public assistance programs included Foster Care and Adoption Assistance. General Fund expenditures in the TANF program are also impacted by realignment, although the program was technically not realigned.

Connecticut: Public Assistance figures exclude medical assistance under the State Administered General Assistance (SAGA) Program; amount for that purpose were \$182 million in fiscal 2010. SAGA clients are now served under the Medicaid expansion for Low Income Adults with expenditures under Medicaid of \$447 million in fiscal 2011 and \$495 million in fiscal 2012.

Hawaii: Employer contributions to current employees' pensions and health benefits: general fund amounts are budgeted centrally (except for Elementary and Secondary Education and Higher Education) and reported in "All Other State Expenditures." For non-general funds, employer contributions are shown in each functional area.

Maryland: The TANF supported Public Assistance Program figures are primarily a reflection of the ramping up and then

leveling off of the Temporary Cash Assistance caseload. Emergency Assistance for Families with Children decreased in FY 12, as did Welfare Avoidance grants.

Michigan: "Other Cash Assistance" figures do not include expenditures for child development and care programs, a large part of Michigan's public assistance program. Child development and care expenditures total \$225.8 million in fiscal 2010; \$191.4 million in fiscal 2011; and estimated at \$189.8 million in fiscal 2012. Actual ARRA expenditures will be recorded with the fiscal 2012 annual financial report.

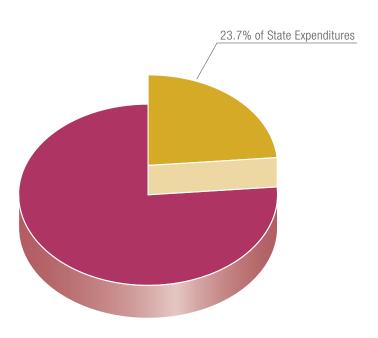

North Dakota: TANF—Cash Assistance includes only the direct cash benefit payments made to TANF recipients. It does not include other grant payments funded with the federal TANF grant.

West Virginia: The Other Cash Assistance figures include Non-TANF EA expenditures which total approximately \$645,000 to \$755,000 per year and the WV Works Separate State program costs for two-parent families and college. The expenditures for the Two-Parent Families program were \$3,387,028 in 2010, \$4,560,208 in 2011 and an estimated \$4,191,071 in 2012. For the College assistance program, the expenditures were approximately \$871,429 in 2010, \$1,110,230 in 2011 and an estimated \$1,108,776 in 2012. These programs are not claimed on the TANF report and are 100% state funded. The total Other Cash Assistance expenditures are approximately \$5,013,457 for 2010, \$6,425,438 for 2011, and an estimated \$5,299,847 for 2012.

MEDICAID EXPENDITURES

Medicaid Expenditures

Medicaid, a means-tested entitlement program financed by the states and the federal government, provides comprehensive and long-term medical care for more than 60 million low-income individuals. Total Medicaid spending in fiscal 2011 was \$393.9 billion, excluding administrative costs, which represents a 9.6 percent increase over fiscal 2010. State funds increased by 20.3 percent and federal funds increased by 4.1 percent over fiscal 2010 amounts.

Medicaid spending for fiscal 2012 is estimated at \$398.4 billion, an increase of 1.2 percent over fiscal 2011. State funds increased by an estimated 16.2 percent while federal funds decreased by 7.8 percent over fiscal 2011 amounts. Fiscal 2012 growth rates in the Medicaid program are significantly below historical trends and reflect many factors including extensive state cost containment actions.

The significant increase in state spending in fiscal 2011 and fiscal 2012 and the significant decrease in federal funding for fiscal 2012 reflect the end of the enhanced Medicaid match rate from the *American Recovery and Reinvestment Act of 2009 (ARRA)*. Under ARRA, all states received a temporary increase in their FMAP as well as additional amounts for those states facing the highest unemployment rates. ARRA was estimated to provide approximately \$100 billion to states through the temporary increase in FMAP payments beginning in October 2008 and ending in June 2011. The January 2011 through June 2011 amount was a six-month scaled back extension from what was originally enacted under ARRA.

States estimate that \$37.8 billion in fiscal 2010 and \$36.2 billion in fiscal 2011 are attributable to the temporary increase in the FMAP under ARRA. In fiscal 2012, states estimate that \$2.5 billion was spent from ARRA funds as the temporary FMAP increase expired. In order to receive the federal funds, states were required to adhere to maintenance of effort requirements (MOE) that included not having more restrictive standards, methodologies and procedures in place than were in place on July 1, 2008.

Also included in Medicaid spending are Medicare Part D "clawback" payments, statutorily known as the phased down state contribution. Beginning in January 2006, prescription drug costs for individuals eligible for both Medicare and Medicaid were no longer part of the Medicaid program. Instead these costs are now included in Medicare Part D. States finance these benefits by providing a payment to the federal Medicare trust fund—commonly known as "clawback" payments. As

shown in Appendix Table A-3, these "clawback" payments totaled \$5.3 billion in fiscal 2010, \$6.2 billion in fiscal 2011, and are estimated at \$8.1 billion for fiscal 2012.

Medicaid spending accounted for 23.7 percent of total state spending in fiscal 2011, the single largest portion of *total* state expenditures, and 16.7 percent of general fund expenditures. In fiscal 2012, it is estimated to be 23.9 percent of total state spending and 19.6 percent of general fund expenditures.

Medicaid Enrollment. The downturn in the economy resulted in significant increases in Medicaid enrollment as it has in previous economic slowdowns though enrollment growth has subsided from its peak of 7.8 percent during the height of the recession. Enrollment growth averaged 4.4 percent in fiscal 2011 with states projecting Medicaid enrollment to grow by an additional 3.2 percent in fiscal 2012, according to the Kaiser Commission on Medicaid and the Uninsured.

Medicaid Cost Containment. In fiscal 2012, 48 states implemented at least one new policy to control Medicaid costs, and 47 planned to do so in fiscal 2013 according to the Kaiser Commission on Medicaid and the Uninsured's 2012 annual survey on Medicaid and state budgets. The report notes that cost pressure and cost containment were still dominant themes, though states were also able to implement program changes, payment and delivery system reforms and re-orient long-term care programs to community-based care models.

National Health Care Reform. The Affordable Care Act, enacted in March 2010, has a significant impact on states and especially on state Medicaid programs. In the Supreme Court's ruling to uphold the constitutionality of the Affordable Care Act. the Court ruled that the Medicaid expansion is constitutional though the federal government could not withhold existing Medicaid funding for states that opted not to participate in the expansion. Beginning January 1, 2014, state Medicaid programs will have the option to expand to cover non-pregnant, non-elderly individuals with incomes up to 133 percent of the federal poverty level. The cost for those newly eligible for coverage will be fully federally funded in calendar years 2014, 2015, and 2016 with federal financing phasing down to 90 percent by 2020. States are required to apply a 5 percent income disregard when determining Medicaid eligibility, effectively bringing the new Medicaid minimum eligibility level to 138 percent of the federal poverty level.

The Affordable Care Act imposes a maintenance of effort (MOE) requirement on eligibility standards, methodologies, and procedures for adults until an exchange is fully operational in

2014 and for children in Medicaid and CHIP through 2019. There is a limited exception during the period January 1, 2011 through December 31, 2013 for a state that certifies it has a budget deficit on or after December 31, 2010.

Challenges and Opportunities in Implementing the Affordable Care Act. There are many challenges and opportunities ahead as states move forward with the implementation of the Affordable Care Act. Some of the most significant challenges cited by states include upgrading current Medicaid eligibility systems and integrating with health insurance exchanges, and accommodating the significant number of new enrollees under Medicaid. Other challenges cited include changing to the modified adjusted gross income eligibility criteria, funding existing programs, the lack of clarity about the federal exchange option, estimating the number of new Medicaid enrollees, and the sheer number of initiatives that need to be implemented in a tight timeframe with reduced workforce capacity. Opportunities cited include the increased federal match for Medicaid eligibility systems, reducing the number of uninsured individuals, reducing premiums for individuals and small businesses, lowering uncompensated care costs, modernizing business processes, and new options for payment and delivery of health care.

Regional Expenditures

The following table shows percentage changes in expenditures for Medicaid for fiscal 2010-2011 and 2011-2012 by region. For 2011, the Far West region is above the national average while the Southeast region is below the national average.

Additional expenditure data on Medicaid can be found on Tables 28-30, accompanied by explanatory notes.

Fund Shares

The figure below provides fund shares for 2011.

Notes: State funds are defined as general funds and other state funds (bonds are excluded).

Medicaid Notes

States were asked to report Medicaid expenditures as follows: General funds: all general funds appropriated to the Medicaid agency and any other agency which are used for direct Medicaid matching purposes under Title XIX. Other state funds: other funds and revenue sources used as Medicaid match, such as local funds and provider taxes, fees, donations, assessments (as defined by the Centers for Medicare and Medicaid Services). Federal Funds: all federal matching funds provided pursuant to Title XIX.

The states were asked to separately detail the amount of provider taxes, fees, donations, assessments and local funds reported as Other State Funds.

Alabama: Fiscal 2010 through fiscal 2012 Other State Funds includes provider taxes in the amounts of \$270 million, \$303 million, and \$319 million, respectively.

Colorado: Included in "Medicaid" expenditures, all part of the Department of Health Care Policy and Financing

Connecticut: Medicaid appropriation is "gross funded"—Federal funds are deposited directly to the State Treasury. Connecticut's FMAP is currently at 50 percent, excluding enhanced FMAP available under ARRA (\$536 million in fiscal 2010 and \$481 million in fiscal 2011). Excludes state portion of Qualified Medicare Beneficiaries and School Based Child Health as those expenditures are netted out of federal Medicaid reimbursement. Also excludes provider taxes, which are deposited directly to the State Treasury.

Florida: Prior year survey responses did not reflect Admin Costs that should have been included in the total Medicaid Expenditures. This is reflected in an increase to reported expenditures to 2010 and 2011 Actual Expenditures in all categories.

Hawaii: Employer contributions to current employees' pensions and health benefits: general fund amounts are budgeted centrally (except for Elementary and Secondary Education and Higher Education) and reported in "All Other State Expenditures." For non-general funds, employer contributions are shown in each functional area.

Michigan: Other state funds include local funds of \$62.0 million, and provider taxes of \$860.0 million for fiscal 2010; local funds of \$81.0 million and provider taxes of \$882.0 million for fiscal 2011; and local funds of \$71.0 million and provider taxes of \$955.0 million for fiscal 2012. Federal revenue support

includes federal ARRA/FMAP funding (\$1,213.8 million for fiscal 2010, \$659.0 million for fiscal 2011, and \$15.0 million for fiscal 2012). Actual ARRA expenditures will be recorded with the fiscal 2012 annual financial report. Public health and community and institutional care for mentally and developmentally disabled persons are partially reported in the Medicaid totals.

Missouri: Medicaid expenditure figures above are from budget office's total state Medicaid report. Total Medicaid expenditures based on MoHealthNet's CMS 64 reports including local funds are; FY 10-\$8,786; FY 11-\$9,113; FY 12 \$10,757.

New Jersey: All Medicaid 2010 Actuals adjusted for revised CMS data and to be consistent with 2011 and 2012 amounts.

New York: Total Medicaid expenditures in FY 2012 reflect the expiration of enhanced FMAP in June 2011, which shifted approximately \$3 billion from a Federal to State share of Medicaid costs.

Tennessee: Regarding Premium Revenue: fiscal 2010 totals \$221 million, fiscal 2011 totals \$325 million, and fiscal 2012 totals \$300 million. Regarding Certified Public Expenditures – Local fund from Hospitals: fiscal 2010 totals \$426 million, fiscal 2011 totals \$374 million, and fiscal 2012 totals \$374 million. Regarding Nursing Home Tax: fiscal 2010 totals \$87 million, fiscal 2011 totals \$85 million, and fiscal 2012 totals \$85 million. Regarding ICF/MR 6 percent Gross Receipts Tax: fiscal 2010 totals \$12 million, fiscal 2011 totals \$12 million. Regarding Intergovernmental Transfers: fiscal 2010 totals \$0 million, fiscal 2011 totals \$0 million, and fiscal 2012 totals \$0 million.

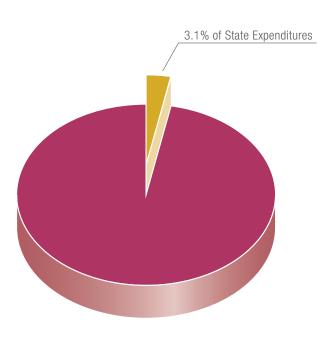

Texas: Increases in General Funds amounts in 2011 and 2012 are due in part to phase out of ARRA.

Vermont: The large variance from 2012 over 2011 in General Funds and Other State Funds is attributable to compensating for the loss of ARRA funding as well as leveraging alternative funding streams to meet the State's Medicaid matching obligation. The breakdown of local funds, etc. included in Other State Funds is as follows for fiscal 2011: provider tax \$112,399,373; employee assessment \$9,316,000; local match provided by schools \$11,451,916; tobacco litigation settlement funds \$35,848,876; other \$82,516,597. The breakdown is as follows for estimated fiscal 2012: provider tax \$144,415,197; employee assessment \$11,168,000; local match provided by schools \$16,151,589; tobacco litigation settlement funds \$36,978,473, other \$118,054,327.

CORRECTIONS EXPENDITURES

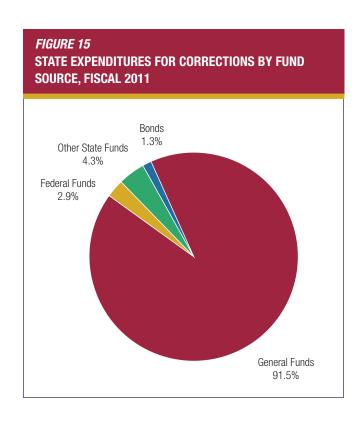

Corrections Expenditures

State spending on corrections reflects the costs to build and operate prison systems and may include spending on juvenile justice programs and alternatives to incarceration such as probation and parole. State spending for corrections totaled \$52.0 billion in fiscal 2011, a 1.1 percent increase compared to fiscal 2010. State spending on corrections in fiscal 2012 is estimated to total \$53.3 billion, a 2.5 percent increase from fiscal 2011. As with other areas of the state budget, spending growth on corrections has slowed considerably over the past several years; as recently as fiscal 2007 state spending on corrections grew by 10.1 percent. Some of the actions states took to rein in corrections spending included closing prisons and other correctional facilities, the early release of prisoners, sentencing reform and employee furloughs.

In fiscal 2011, corrections spending represented 3.1 percent of total state spending and 7.5 percent of general fund spending.

General fund dollars are used primarily to fund state corrections spending and account for \$47.6 billion, or 91.5 percent, of all fiscal 2011 state corrections spending. State funds (general funds and other state funds combined, but excluding bonds) accounted for 95.8 percent of total state corrections spending in fiscal 2011. Federal funds accounted for 2.9 percent and bonds accounted for 1.3 percent. Federal funds grew sharply in fiscal 2010 by 39.2 percent, due to the *American Recovery and Reinvestment Act of 2009 (ARRA)*, which provided \$1.9 billion in corrections funds. However, in fiscal 2011 federal funds are estimated to decline by 26.0 percent as ARRA corrections spending slows to \$783 million. Federal funds for corrections are estimated to decline even further in fiscal 2012 by 39.4 percent as ARRA corrections spending is reduced to \$433 million.

Data on capital expenditures for corrections are displayed in Chapter Eight (Table 49).

Regional Expenditures

Table 31 shows changes in corrections expenditures by region between fiscal 2010 and fiscal 2011 and between fiscal 2011 and estimated fiscal 2012. Of note, fiscal 2011 corrections spending in the Far West region increased by 12.7 percent, while corrections spending in the Mid-Atlantic region declined by 6.1 percent.

Corrections—Expenditures Exclusions

Some states exclude certain items when reporting corrections expenditures. Twenty-two states wholly or partially excluded juvenile delinquency counseling from their corrections figures and seventeen states wholly or partially excluded spending on juvenile institutions. Twenty states wholly or partially excluded spending on drug abuse rehabilitation centers and forty states wholly or partially excluded spending on institutions for the criminally insane. Eighteen states wholly or partially excluded aid to local governments for jails. For details, see Table 36.

Corrections Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Colorado: Juvenile delinquent counseling programs are funded in the Colorado Department of Human Services, Division of Youth Corrections (DYC). Funding for the Youthful Offender System (youths convicted as adults) is in the Colorado Department of Corrections. Regarding institutions for the criminally insane, San Carlos services significantly mentally ill inmates, but note that the Colorado Dept of Human Services Forensics Institute serves mentally ill people including those found not guilty by reason of insanity.

Florida: Expenditures for FY 2009-10 and FY 2010-11 adjusted to exclude expenditures for drug abuse rehabilitation programs per the instructions. These funds were inadvertently included in the prior year submission.

Hawaii: Employer contributions to current employees' pensions and health benefits: general fund amounts are budgeted centrally (except for Elementary and Secondary Education and Higher Education) and reported in "All Other State Expenditures." For non-general funds, employer contributions are shown in each functional area.

Maryland: Although operating budget funding increased from FY 10 to FY 11, and then from FY 11 to FY 12, Capital bond funds decreased from \$84 million in FY 10 to \$11 million in FY 11. The amount of Capital bond funds increased from \$11 million to \$17 million in FY 12. The decrease in Capital bond funds is the reason that Corrections funding in FY 11 and FY 12 is lower than FY 10.

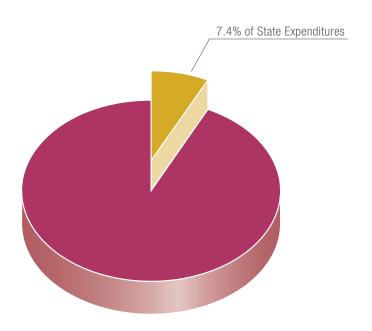

Michigan: Figures include adult inmate and juvenile justice expenditures. The reduction in spending from fiscal 2010 to fiscal 2011 reflects the continued drop in inmate population levels of over 700 (1.8%) and operational efficiencies. For fiscal 2012, the projected expenditure increase is largely due to statewide funding adjustments for other post-employment benefits.

Utah: Expenditure amounts for Corrections do not include any amounts for prison industries. In Utah, Prison Industries is operated as an enterprise fund and does not usually receive support from state appropriations. The prison industry program has been self-sufficient for the last 10 to 15 years.

TRANSPORTATION EXPENDITURES

Transportation Expenditures

Transportation expenditures totaled \$122.8 billion in fiscal 2011, 7.4 percent of total state spending and an increase of 0.8 percent over the previous year. State funds for transportation increased 2.3 percent in fiscal 2011, while federal funds declined 1.8 percent. In fiscal 2012, total state expenditures for transportation are estimated to grow by 9.1 percent. Much of this increase is due to California, which saw total state transportation expenditures increase by an estimated 62.5 percent in fiscal 2012. North Dakota also experienced a large growth in transportation spending with total state expenditures increasing by 46.3 percent.

Approximately 55.5 percent of fiscal 2011 transportation expenditures are funded from earmarked revenues placed in special transportation trust funds, captured in the "Other State Funds" category in this report. The largest earmarked revenue source is the gasoline excise tax. While "Other State Funds" account for the majority of transportation spending, federal funds also play a large role. In fiscal 2011, federal funds accounted for 32.1 percent of total transportation spending, with bonds (10.2 percent) and general funds (2.3 percent) comprising the remaining amount. Federal funds have grown from representing 28.9 percent of overall transportation expenditures in fiscal 2008, the last year before the *American Recov*-

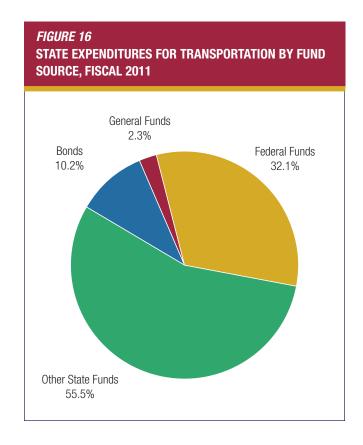

ery and Reinvestment Act (ARRA), to 32.1 percent in fiscal 2011. States reported that they received \$11.9 billion in ARRA transportation funds in fiscal 2010, \$8.6 billion in fiscal 2011, and an estimated \$5.5 billion in fiscal 2012.

Federal Transportation Funding

On July 6, 2012, President Obama signed into law the *Moving Ahead for Progress in the 21st Century Act (MAP-21)*. The legislation (P.L. 112-141) marks the first long-term reauthorization for surface transportation programs passed since the 2005 Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). Federal-aid highway programs had been operating under a series of temporary extensions since SAFETEA-LU expired in 2009. MAP-21 covers highway programs through September 2014 at current spending levels and restructures programs to consolidate and offer more flexibility to states to decide how to allocate funds. MAP-21 funds surface transportation programs at over \$105 billion for federal fiscal years 2013 and 2014.

Fund Shares

The figure below provides fund shares for fiscal 2011.

Regional Expenditures

Table 37 shows percentage changes in transportation expenditures by region between fiscal 2010 and fiscal 2011 and between fiscal 2011 and estimated fiscal 2012.

TABLE 37

Transportation—Expenditure Exclusions

Forty-one states wholly exclude state police and highway patrols from the transportation expenditures contained within the report. Additionally, forty states wholly or partially exclude port authority operations, twenty-two states exclude truck enforcement regulation programs, twenty states omit motor vehicle licensing, and fourteen states exclude gasoline tax and fee collections. For details, see Table 41.

Transportation Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Colorado: Per the Office of the State Controller, last year the presentation of the Department of Transportation's budget related to highway operations was changed from capital to operating. It had been included as capital previously. The estimate provided for the 2010 survey was reflected on the former capital basis. Port authority operations, gasoline tax and fee collections, and motor vehicle licensing are at Department of Revenue, not Transportation. State police/highway patrol are funded at the Department of Public Safety.

Hawaii: Employer contributions to current employees' pensions and health benefits: general fund amounts are budgeted

centrally (except for Elementary and Secondary Education and Higher Education) and reported in "All Other State Expenditures." For non-general funds, employer contributions are shown in each functional area.

Maryland: Transportation Capital expenditures were inadvertently omitted last year. Construction debt service and information technology projects are included. Highway User Revenue has been included as an operating expenditure. Correction from last year: Transportation's "Other Bond Funds" should be 0.

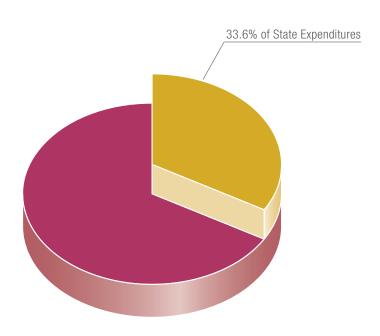

Michigan: Actual ARRA expenditures will be recorded with the fiscal 2012 annual financial report.

Tennessee: Bond estimates represent bond authorizations, while actual bonds represent bond proceeds utilized.

ALL OTHER EXPENDITURES

All Other Expenditures

The "All Other" category reflects a substantial amount of state spending not included in the categories described in previous chapters. "All Other" spending in states includes the Children's Health Insurance Program (CHIP), institutional and community care for the mentally ill and developmentally disabled, public health programs, employer contributions to pensions and health benefits, economic development, environmental projects, state police, parks and recreation, housing, and general aid to local governments (a list of the items excluded from the "All Other" category is displayed in Table 46).

The "All Other" category of expenditures totaled \$559.2 billion for fiscal 2011, or 33.6 percent of total state spending. Total spending in the "All Other" category declined by 0.4 percent in fiscal 2011 and increased by an estimated 0.4 percent in fiscal 2012. While state funds (general funds and other state funds combined) grew by 1.2 percent in fiscal 2011 and by an estimated 2.4 percent in fiscal 2012, federal funds declined by 3.6 percent in fiscal 2011 and by 6.6 percent in fiscal 2012. The declines in federal funds for the "All Other" category can be traced to a reduction in *American Recovery and Reinvestment Act (ARRA)* funds. States reported \$32.9 billion in "All Other" ARRA spending in fiscal 2010, \$21.4 billion in fiscal 2011, and an estimated \$10.7 billion in fiscal 2012.

Children's Health Insurance Program

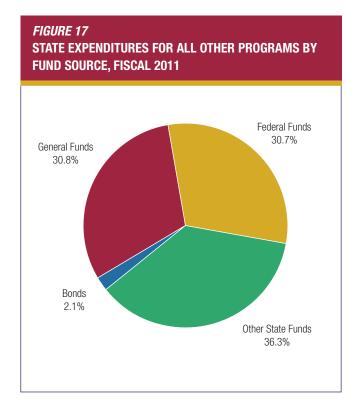

Enacted as part of the *Balanced Budget Act of 1997*, the State Children's Health Insurance Program (SCHIP) expanded health

coverage for previously uninsured children. The program is targeted toward children from families with incomes too high to qualify for Medicaid but too low to afford private insurance. SCHIP's original ten-year authorization ran through September 30, 2007. Legislation was signed in January 2008 that extended SCHIP until March 2009 at levels that would provide coverage for the current enrollment population. In February 2009, the Children's Health Insurance Program Reauthorization Act (CHIPRA) was signed into law. Along with renaming the program, the reauthorization act expanded children's coverage and added \$33 billion in federal funds through 2013, financed mostly by increased federal tobacco taxes.

According to the Centers for Medicare and Medicaid Services (CMS), approximately 7.7 million children were enrolled under CHIP during fiscal 2010. As shown in Appendix Table A-2, total spending for CHIP was \$11.3 billion in fiscal 2010, \$11.5 billion in fiscal 2011, and is estimated at \$11.6 billion in fiscal 2012.

Fund Shares

The figure below illustrates fund shares for fiscal 2011.

Regional Expenditures

The following table shows percentage changes for "All Other" expenditures for fiscal 2010-2011 and 2011-2012 by region. For fiscal 2011, the Southeast region was above the national average while the Southwest region was below the national average.

All Other Expenditure Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Colorado: CHIP is included in "Medicaid" expenditures, all part of the Department of Health Care Policy and Financing.

Hawaii: Employer contributions to current employees' pensions and health benefits: general fund amounts are budgeted centrally (except for Elementary and Secondary Education and Higher Education) and reported in "All Other State Expenditures." For non-general funds, employer contributions are shown in each functional area.

Illinois: Fiscal 2012 GRF expenditure includes \$4,135 million for meeting the statutorily required pension obligation. In fiscal 2010 and fiscal 2011 this obligation was met through debt proceeds.

Michigan: Public health and community and institutional care for mentally and developmentally disabled persons are partially reported in the Medicaid totals. Actual ARRA expenditures will be recorded with the fiscal 2012 annual financial report.

New York: New York budgets most employer contributions to employee's benefits and pensions centrally. The portion of employer contributions to employee's benefits not distributed to an expenditure category has been included in the All Other Expenditures category.

CAPITAL EXPENDITURES

Capital Expenditures

Capital expenditures are made for new construction, infrastructure, major repairs and improvements, land purchases and the acquisition of major equipment and existing structures. Minor repairs and routine maintenance are reported as operating expenses. Given the long-term nature of capital projects, states often find it difficult to report capital expenditures for one specific fiscal year. This is because the amount of money appropriated when a project initially is undertaken usually will not be the amount spent in a single year. For greater detail on states' capital spending practices, see the report Capital Budgeting in the States, available at www.nasbo.org in the publications and data section.

The following chapter includes capital expenditures for higher education, corrections, transportation, environmental projects, housing, and "all other". Due to differences in states' reporting capabilities, or expenditures for items not easily classified, capital expenditures not included in these categories are included in the "All Other" category. Tables 47-53 display capital expenditure data.

Total Capital Expenditures

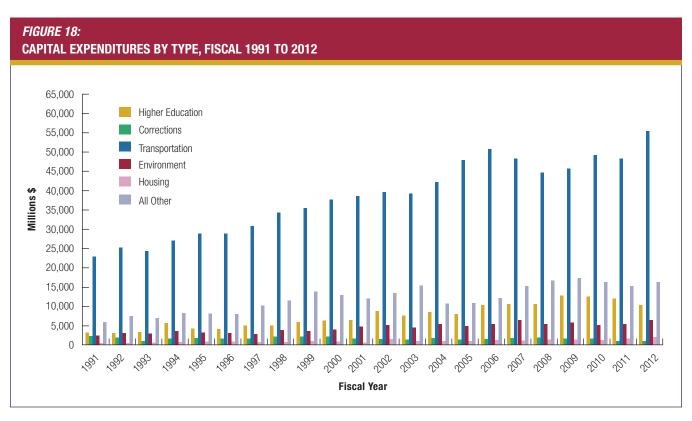

Because the nature of capital spending includes long construction timetables and unforeseen or delayed project costs, increases in state spending on capital projects are generally followed by a slowdown or decrease in spending. States decreased capital spending by 2.9 percent in fiscal 2011, but increased capital spending by an estimated 9.5 percent in fiscal 2012. Overall, state capital spending totaled \$85.9 billion in fiscal 2010, \$83.4 billion in fiscal 2011, and is estimated to total \$91.3 billion in fiscal 2012. Capital spending has been partly financed over the past several years by the *American Recovery and Reinvestment Act of 2009 (ARRA)*. Along with providing increased federal funds to states, ARRA also included a number of bond provisions such as Build America Bonds, Recovery Zone Economic Development Bonds, and School Construction Bonds.

Capital Fund Sources

State spending on capital projects traditionally has come from non-general fund sources. Bonds (33.5 percent in fiscal 2011) and other state funds such as dedicated fees and fund surpluses (33.3 percent) combine to account for 66.8 percent of total state spending on capital projects. Federal funds (28.8 percent) and state general funds (4.4 percent) also contribute to capital spending.

Capital Funds by Use

Comprising 57.8 percent (\$48.2 billion) of all capital expenditures in fiscal 2011, **transportation** is the largest category of

state capital expenditures. Capital spending for transportation declined by 2 percent in fiscal 2011, and is expected to increase by 14.9 percent in fiscal 2012.

Higher education capital expenditures decreased by 4.3 percent in fiscal 2011, totaling \$12.0 billion, and accounting for 14.4 percent of total state capital outlays. In fiscal 2012, higher education capital spending is estimated to decrease by 13.7 percent.

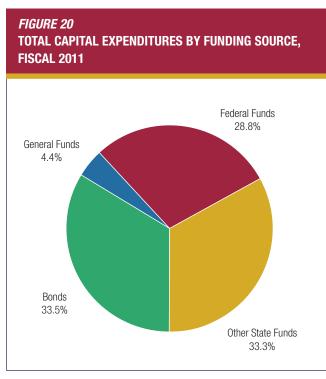

State capital spending for **environmental** purposes in fiscal 2011 totaled \$5.4 billion, 6.4 percent of total capital spending and a 5.7 percent increase from fiscal 2010. Environmental capital expenditures are estimated to increase 19.2 percent in fiscal 2012, due mostly to increased expenditures in California.

Housing capital expenditures account for just 2.0 percent of total fiscal 2011 capital spending, at approximately \$1.7 billion. Housing capital spending increased by 28.9 percent in fiscal 2011, and is estimated to increase by 18.2 percent in fiscal 2012, rising to \$2.0 billion.

Corrections capital spending experienced a decrease of 34.8 percent in fiscal 2011, totaling \$1.01 billion. Corrections accounted for only 1.2 percent of total state capital expenditures. Fiscal 2012 estimates indicate spending of \$1.03 billion, a 1.9 percent increase.

State spending for "all other" purposes totaled \$15.2 billion in fiscal 2011, or 18.2 percent of total capital spending. This

includes capital expenditures not easily classified into one of the other categories. Examples of expenditures in the "all other" category may include items such as public school facilities, zoo improvements, health care infrastructure, or sports facilities. In fiscal 2012, "all other" capital spending is estimated to increase by 6.8 percent to \$16.2 billion.

Capital Spending Notes

Alabama: Capital expenditures for higher education are not captured/available at the state budget level. Capital expenditures for Environmental and All Other from Federal and Other State Funds are not reported separately, combined amounts are included in the Other State Funds.

Colorado: Per the Office of the State Controller, last year the presentation of the Department of Transportation's budget related to highway operations was changed from capital to operating. It had been included as capital previously. The estimate provided for the 2010 survey was reflected on the former capital basis.

Hawaii: Unable to separate federal funds and other state funds capital expenditures into the Housing and Environmental functional areas; included in "All Other State Expenditures."

Maryland: Transportation Capital expenditures were inadvertently omitted last year. Construction debt service and information technology projects are included.

Michigan: Higher education capital expenditures made from non-state funds are excluded. Effective with fiscal 2010, transportation capital expenditures reflect funding for local projects. Historically these expenditures were reported under total transportation expenditures but not as a component of capital spending.

New Jersey: General Funds 2010 Actual capital expenditures revised to include "Additions, Improvements and Equipment" spending.

Tennessee: Bond estimates represent bond authorizations, while actual bonds represent bond proceeds utilized.

Texas: Transportation figures do not include highway construction. Higher education figures include amounts for Community Colleges that could not be broken out by method of finance.

Utah: All numerical information presented represents bond "expenditures". All bond information included in the report is for General Obligation bonds. Not included in the report is State Building Ownership Authority (SBOA) Revenue Bonds or Board of Regents Revenue Bonds.

Numerous revolving loan programs have been established by the State of Utah. These loan funds are typically provided startup General Fund appropriations when established. Some loan funds receive periodic General Fund appropriations to enhance the loan programs. Once established, loan repayments generally remain within the loan programs in order to provide additional monies for future loans. Regarding Housing, one revolving loan program provides low-interest loans and grants to Utah residents for low-income housing. This loan fund is the Olene Walker Housing Trust Fund (\$10 million available in 2010, \$4 million available in 2011, and \$7 million projected available for 2012). These funds were shown under capital for housing in previous years, but were reclassified in the 2002 expenditure report to a footnote. Regarding Environmental, several revolving loan programs provide low-interest loans to local governments, such as cities and counties, to provide water and sewer systems. These loan funds include: 1) Water Resources Construction Fund (\$4 million available in 2010, \$8 million available in 2011, and \$12 million projected available for 2012); 2) Water Resources Cities Water Loan Fund (\$2 million available in 2010, \$1 million available in 2011, and \$4 million projected available for 2012); 3) Water Resources Conservation and Development Fund (\$58 million available in 2010, \$40 million available in 2011, and \$51 million projected available for 2012); 4) Water Quality Loan Fund (\$53 million available in 2010, \$51 million available in 2011, and \$24 million projected available for 2012); and 5) Drinking Water Loan Fund (\$20 million available in 2010, \$31 million available in 2011, and \$27 million projected available for 2012).

REVENUE SOURCES IN THE GENERAL FUND

Revenue Sources in the General Fund

General fund revenue, the source of most state expenditures, totaled \$637.2 billion in fiscal 2011. The three main sources of general fund revenue, personal income taxes, sales and compensating use taxes, and corporate income taxes accounted for 79 percent of general fund collections. Specifically, personal income taxes accounted for 40.3 percent of the total, sales and compensating use taxes for 32.1 percent, and corporate income taxes for 6.5 percent of total general fund revenues in 2011. Other taxes and fees represent 20.4 percent of general fund revenues, while gaming taxes were 0.7 percent. The major sources of general fund revenues are displayed by state in Table 54.

Depending on the state, "other taxes and fees" may include cigarette and tobacco taxes, alcoholic beverage taxes, insurance premiums, severance taxes, licenses and fees for permits, inheritances taxes, and charges for state-provided services.

States use a variety of taxes and fees to finance programs, not all of which are reflected in the general fund. These include some gaming taxes, lottery proceeds, and motor vehicle fees, which often are earmarked for special purposes or specific funds, such as education or roads.

Table 55 illustrates the major items that are excluded from general fund revenue sources. For example, property taxes are a mainstay of local government finance and the majority of states exclude them from both their general funds and their

revenue bases. However, many states use aid to local governments or other subsidies to help reduce the amount of property taxes local governments collect.

State Tax Collection Trends

State general fund revenues declined sharply in fiscal 2009 and fiscal 2010 due to the downturn in the national economy. States collected \$670.5 billion in general fund revenues in fiscal 2008, but that total fell to \$603.3 billion in fiscal 2009 and fell even further in fiscal 2010 to \$592.8 billion. In total, revenues declined \$77.6 billion during the two-year period, or 11.6 percent.

Revenue conditions noticeably improved for states in fiscal 2011 compared to fiscal 2010, with total general fund revenues increasing 7.5 percent. With the exception of gaming taxes, all of the other various sources of state revenue increased in fiscal 2011. Corporate income taxes and personal income taxes experienced the largest increases at 10.5 percent and 9.7 percent respectively, while other taxes and fees grew 6.3 percent, sales taxes grew 5.3 percent, and gaming taxes declined by 3.9 percent.

State general fund revenues again increased in fiscal 2012, increasing by 2.7 percent compared to fiscal 2011. However, the growth rate in fiscal 2012 noticeably slowed compared to the prior fiscal year and fiscal 2012 total state general fund revenues remain \$16 billion, or 2.4 percent below fiscal 2008 levels.

Revenue Sources in the General Fund

Alabama: Fiscal 2010 revenue amount includes a \$162 million transfer from General Fund Rainy Day Account in Other Taxes and Fees.

California: Horse racing is partially excluded under gaming taxes.

Colorado: The source of fiscal 2010 revenue figures is Table 2 of June 2011 OSPB forecast, while the source for fiscal 2011 and fiscal 2012 is Table 2 of June 2012 OSPB forecast. This "other taxes" area reflects cigarette, tobacco, liquor, estate, insurance, interest incomde, pari-mutuel, court receipts, and other income. This income is offset by a diversion to the State Education Fund of one-third of 1% of Colorado taxable income, which is required by the Colorado Constitution to be transferred. This sum reduces the amount of "other taxes and fees" by its inclusion in this category. The SEF diversion was estimated at \$448.9M in FY 11-12, was \$393.9M in FY 10-11, and \$372.1M in FY 09-10. Regarding personal income taxes and corporate income taxes, one-third of 1% of Colorado taxable income is required to be transferred to a special fund for education each year. Thus, not all income tax revenue is credited to the General Fund.

Hawaii: Hawaii does not have Gaming Taxes, Lottery Funds, Property Taxes, or Severance Taxes.

Michigan: Actual fiscal 2010 and fiscal 2011 amounts reflect general fund non-dedicated revenue as contained in the respective State of Michigan Comprehensive Annual Financial Reports. Revenue figures have been adjusted to put them on a basis comparable to the consensus estimates. Fiscal 2012 estimates are the May 2012 consensus revenue estimates.

Texas: Texas has no personal/corporate income tax, gaming taxes, or statewide property tax.

Washington: Fiscal 2010 totals are based on the November 2011 revenue forecast document while fiscal 2011 and estimated fiscal 2012 are based on the June 2012 revenue forecast document.

Children's Health Insurance Block Grants

Colorado: Fiscal 2012 is an actual figure rather than an estimate.

Connecticut: CHIP Appropriation is "gross funded": federal funds are deposited directly to the State Treasury. Connecticut's FMAP is currently at 65 percent of CHIP benefit costs.

Massachusetts: Revenue includes prior year adjustments.

Michigan: Michigan received federal approval of the Adult Benefit Waiver (ABW) to expand health care coverage to childless adults using SCHIP funds in fiscal 2004. As of January 1,

2010, the ABW program was converted to a Medicaid (Title XIX) financed waiver. Enrollment in the traditional program for children ("MIChild") has grown from an average 30,200 in fiscal 2010 to 37,700 in the third quarter of fiscal 2012.

New Jersey: 2010 Actual adjusted for revised CMS data and to be consistent with 2011 and 2012 amounts.

Tennessee: Tennessee began receiving funds for the Child Health Insurance Block Grant in fiscal 2007.

Medicare Part D Clawback Notes

Colorado: Fiscal 2012 is an actual figure rather than an estimate.

Utah: The FY 2012 numbers are actual amounts. The amounts reported for FY 2010 and FY 2011 were less because the federal government determined these expenditures were entitled to ARRA funding so they calculated the amount and posted a retroactive amount in February 2010 for January 2010 billing. Therefore, DOH did not owe money to the federal government because they had a credit balance for half of 2010 and one quarter of 2011. In addition, state finance processed one claim at the end of FY 2011 as a FY 2012 payment.

Methodology

The Fiscal Year 2011 State Expenditure Report reflects three years of data: actual fiscal year 2010, actual fiscal year 2011, and estimated fiscal year 2012. The text of this report focuses on actual fiscal year 2011 data, with a secondary focus on estimated fiscal 2012.

This report documents state expenditures in six functional categories: elementary and secondary education, higher education, public assistance including Temporary Assistance for Needy Families and other cash assistance, Medicaid, corrections, and transportation. All other expenditures make up a seventh category. The report includes expenditures from four fund sources, including general funds, federal funds, other state funds, and bonds. States were asked to include spending from the American Recovery and Reinvestment Act of 2009 (ARRA) in the federal funds totals for the seven categories. Data for each category typically include employer contributions to current employees' pensions and to employee health benefits for employees.

Elementary and secondary education spending includes state and federal fund expenditures only, and excludes local funds raised for education purposes. States also were asked to include, where applicable, state expenditures that support the state's Department of Education, transportation of school children, adult literacy programs, handicapped education programs, programs for other special populations (i.e., gifted and talented programs), anti-drug programs, and vocational education. States were asked to exclude spending for day care programs in the school system and spending for school health and immunization programs.

For higher education, states were requested to include expenditures made for capital construction, community colleges, vocational education, law, medical, veterinary, nursing and technical schools, and assistance to private colleges and universities, as well as tuition, fees and student loan programs. Higher education expenditures exclude federal research grants and endowments to universities.

Spending for public assistance includes expenditures for cash assistance under the Temporary Assistance for Needy Families (TANF) program and other cash assistance (i.e., state supplements to the Supplemental Security Income program, general or emergency assistance). States were asked to exclude administrative costs from reported expenditures.

Medicaid spending amounts exclude administrative costs, but include spending from state funds, federal matching funds and other funds and revenue sources used as a Medicaid match such as provider taxes, fees, assessments, donations, and local funds. Medicare Part D clawback payments are included in a state's overall Medicaid expenditures, and are also listed separately in the Appendix.

For corrections, states were asked to include, where applicable, expenditures for capital construction, aid to local governments for jails, parole programs, prison industries, and community corrections, as well as expenditures made for juvenile correction programs. States were asked to exclude expenditures for drug abuse rehabilitation programs and institutions for the criminally insane.

Transportation figures include capital and operating expenditures for highways, mass transit, and airports. States were also asked to include expenditures for road assistance to local governments, the administration of the Department of Transportation, truck and train/railroad programs, motor vehicle licensing, and gas tax and fee collection. The data exclude spending for port authorities, state police and highway patrol.

The "all other" expenditure category includes all remaining programs not captured in the functional categories previously described, including the Children's Health Insurance Program and any debt service for other state programs (i.e., environmental projects, housing). States with lotteries were asked to exclude prizes paid to lottery winners. States were also asked to exclude expenditures for state-owned utilities and liquor stores.

Capital spending is included with operating expenditures within each functional category, unless otherwise noted. Capital expenditures have also been collected separately in the following categories: corrections, environmental projects, higher education, housing, and transportation. Capital expenditure data can be found in Chapter Eight.

Chapter Nine illustrates the major sources of state revenue including sales taxes, personal income taxes, corporate income taxes, gaming taxes, and other taxes and fees. This chapter only contains information on general fund revenue.

Tables included in four of the functional categories reflect expenditures that states have excluded from their reported data. Each table underscores the observation that state-tostate expenditure comparisons in any functional category can

STATE EXPENDITURE REPORT 101

be misleading. For example, one state may have included its juvenile institutions in its corrections budget, while another state may have included them in its human resources budget. Comparisons for one state over time, however, should prove accurate.

All years reported are state fiscal years unless otherwise indicated. In 46 states the fiscal year begins on July 1 and ends on June 30. The exceptions are as follows: in Texas, the fiscal year begins on September 1; in Alabama and Michigan the fiscal year begins on October 1; and in New York, the fiscal year begins on April 1. Additionally, the length of budget cycles vary among states, with more than half of the states budgeting annually and the remainder enacting biennial budgets.

Definitions

General Fund: predominant fund for financing a state's operations. Revenues are received from broad-based state taxes. There are differences in how specific functions are financed from state to state, however.

Federal Funds: funds received directly from the federal government.

Other State Funds: expenditures from revenue sources, which are restricted by law for particular governmental functions or activities. For example, a gasoline tax dedicated to a highway trust fund would appear in the "Other State Funds" column (Note: For Medicaid, other state funds include provider taxes, fees, donations, assessments and local funds).

Bonds: expenditures from the sale of bonds, generally for capital projects.

State Funds: general fund plus other state fund spending, excluding state spending from bonds.
